ANNUAL TOWN MEETING February 11th, 1929

At a legal meeting of the Inhabitants of the Town of Chelmsford qualified to vote in Town affairs held pursuant to Warrant duly posted, the meeting was held at the upper town hall, at Chelmsford Centre, on Monday, Feb. 11, 1929, at 9.30 a. m., and the following business was transacted:

Under Article 1. To hear the reports of the Town officers and committees, $\frac{1}{2}$

It was voted to accept the Town Report as printed with typographical errors corrected.

The following report was made by Herbert C. Sweetser for the committee appointed to construct and equip a well at South Chelmsford: The committee appointed to construct a well and equip the same at South Chelmsford, have attended to that duty. After the well was located on the westerly side of the Acton Road opposite the park, bids were called for and the contract was awarded to Frank M. Banks, of Acton, Mass. The well is now complete and equipped with a deep well pump, the stone trough was moved from the old well to the new, and placed on a cement foundation. Analysis of the water proved it to be good for drinking and domestic purposes.

WILBUR E. LAPHAM ARCHIBALD COOKE HERBERT C. SWEETSER Committee.

This report was accepted and placed on file.

Roy Clough reported for the committee on improving the common at Chelmsford Centre, as follows:

The committee appointed on improving the common at Chelmsford Centre cannot at this time make a final report as the contract on this work will not be completed until the fall of this year.

This report was accepted as a report of progress.

George Righy reported for the committee appointed to report on "The advisability of relocating Central Square," as follows:

This committee asks for further time to study these conditions and asks that they report at the next Annual Town Meeting, and it was so voted.

George Rigby reported for the Selectmen on "Surveying the street lighting system," as follows: The Selectmen ask for further time in this matter, and it was so voted.

Frank J. Lupien reported for the committee appointed to investigate school housing conditions at North Chelmsford as follows:

This committee have done nothing since making its last report and do not feel that business conditions warrant any radical change for a few years to come.

This report was accepted and placed on file.

Town Clerk Harold C. Petterson read a report submitted by the new grade school building committee, as follows:

"At the Annual Town Meeting held on Monday, Feb. 9, 1925, a committee comprising of Charles H. Clough, Thomas H. Varnum, M. Edward Riney, F. Vincent Kelley, and William E. Belleville, were appointed to purchase land, construct, equip, furnish and grade the grounds around a new school building, this new school building was completed as voted by the Town, the appropriation for said building was \$144,725.00, of this amount \$96,144.43 was expended in 1925, \$48,211.12 was expended in 1926, \$270.90 was expended in 1927, and \$162.00 was expended in 1928, leaving a balance of \$37.45.

The school committee have used this building for school purposes since Sept. 1926 and we believe that this is one of the best of school buildings in this county and we ask at this time that the voters act upon this report and that this committee be discharged.

CHARLES CLOUGH, Chairman.
M. EDWARD RINEY, Sec'y.
F. VINCENT KELLEY
WILLIAM E. BELLEVILLE
THOMAS H. VARNUM
Building Committee.

This committee was given an unanimous vote of thanks for the splendid work accomplished and this committee was discharged as requested.

George Rigby reported for the Selectmen regards the state taking over the Boston and North roads so-called, as follows:

That the Selectmen had petitioned the state in conjunction with the Town of Billerica to take over as state highways the Boston Itoad and the North Road and that they were awaiting a hearing on this matter with the state highway officials.

Under Article 2. On a motion made by J. C. Monahan it was voted to postpone this article until after the noon recess, 1 p. m.

Under Article 3. On motion made by Ralph P. Adams, it was voted; to authorize the Selectmen to act as its agent in any suit or suits and to employ counsel to defend and prosecute such suit or suits or claims that may arise.

TOWN ACCONTANTANT'S REPORT

To The Honorable Board of Selectmen and to the Citizens of Chelmsford:

I herewith present my annual report in accordance with Chapter 624, Section 7 of Revised Laws. I have also presented all such other financial matters as may be of general interest.

If there is any part of this report which is not perfectly clear to the reader the Town Accountant will be only too glad to explain the item on request.

I wish to remind the general public that all books of accounts are open to them for their inspection at any time and the Accountant will be pleased to assist any person who wishes to examine the same.

All transfers made and shown in this report were authorized by vote of the Finance Committee, or by vote in Town Meeting.

Chelmsford, as many other towns in the Commonwealth, has followed the old custom of making a revaluation of the real estate once in ten years. The last time such a valuation was made, was in 1920. We hope an article may be inserted in the Warrant for the Annual Town Meeting, to see if the taxpayers are desirous of having the same method carried out in 1930. We believe it would not be possible for the assessors to canvas the town with that end in view, and use the results of such canvas in the 1930 assessment. We endeavor to equalize the values on all property as much as is possible, for instance, when a new

house is built we place a value on it, the next year a complaint comes in from someone who thinks the man with the new house is not assessed as much as himself with an older house; in such cases, we investigate and if we find a just cause for complaint, we do all that can be done to equalize the values. Since we have a great many of such complaints some values do not remain the same through the ten-year period. Some towns in the State are employing engineers to survey and make maps of the real estate that will assist the assessors in making values. If this could be done for Chelmsford, we think in a very few years it would prove to be one of the best ventures the town ever made.

Respectfully submitted,

HERBERT C. SWEETSER, WARREN WRIGHT, JOHN E. HARRRINGTON,

Assessors.

CEMETERY COMMISSIONERS' REPORT

December 16, 1929,

To the Board of Selectmen,

Chelmsford, Mass.

Gentlemen:

The Cemetery Commissioners beg to submit the following report for the year ending December 31, 1929:

Forefathers' cemetery has received the usual good care. In the old section, where all the slate slabs were reset two yars ago, it has been kept mowed with lawn mowers all the season and a number of lot owners have had their lots re-graded which helps to give the cemetery a much better appearance.

Pine Ridge has had a number of improvements. The brush around the new lots has all been cut and burned. New lots are being taken up here each year as Forefathers is all full.

Hart Pond, the remainder of old section, has been graded and reseeded and all of that section will now be mowed with lawn mower, which will add a great deal to the appearance of the cemetery. We are filling in some of the walks and seeding them each season. Three new lots have been sold in 1929.

Riverside has received the usual good care and improvement. The lots in this cemetery are nearly taken. Some were put in to perpetual care this past season.

West Cemetery has been kept most attractive this past season. Everything has been kept mowed and all the walks and drives well cleaned and raked. One of the large pine trees was struck by lightning and had to be removed.

Fairview, the town's new cemetery, lots are being taken up quite readily; this will be one of the town's most attractive cemeteries, as more lots are sold.

At our annual meeting this year we adopted the following rule, concerning foundations under monuments and markers: "After April 1st, 1929, under all monuments and markers in Chelmsford cemeteries there must be a foundation of stone and cement throughout, the full size of the base and to go five feet into the ground. This foundation must be built by the superintendent, or under his instruction."

This is a rule that now exists in most cemeteries and is one, we feel, is most necessary, as all monuments will be permanent.

The cemetery commissioners feel that all the cemeteries have shown a marked improvement this past season.

Respectfully submitted,

ARTHUR O. WHEELER, BAYARD C. DEAN, C. WESLEY LYONS,

Commissioners.

REPORT OF INSPECTOR OF ANIMALS

December 31, 1929.

Board of Selectmen:

In accordance with Section 19, of Chapter 129 of the General Laws, an inspection of all neat cattle, sheep and swine found in this town was ordered by the State Division of Animal Industry to be completed before March 15, 1929.

There were 196 stables in which were kept 846 cows, 16 bulls, 168 young cattle, 361 hogs. 16 sheep and 3 goats. Four cows having tuberculosis were killed. In January at the Town Farm three of the six cows kept were condemned for tuberculosis upon physical examination. I recommend that all cattle kept on this farm be tested and the reactors killed.

The number of hogs is decreasing but their condition is improving as most of them are inoculated against hog cholera. No cases of this disease were found this year and no cases of glanders in horses were found this year.

Thirty-five reported dog bites have been investigated, none of which proved serious and some were trivial. No cases of rabies developed during the year, but twenty dogs which had bitten persons were quarantined and held under observation for two-week periods.

A progressive feature of the work this year has been the interest shown by cattle owners in tuberculosis eradication. An interesting and instructive meeting on this subject was held at the town hall in July. The arrangements for this meeting were made by your inspector and the principal speaker was Mr. Evan F. Richardson, Director of Massachusetts Division of Animal Industry. Other speakers were present from the Massachusetts Department of Agriculture and Middlesex County Extension Service. The campaign against this disease has resulted in the testing of 214 cattle in 17 herds, 174, or 81 1-3 per cent reacted and were killed, on second test in 4 herds 3 of 26 cows reacted or 11 1-2 per cent. Any cattle owner who is interested in having this test applied to his herd can secure the required papers and information from his inspector.

A large increase in inter-state shipments of cattle was noted this year. 751 cows, 90 bulls, 908 calves and 14 sheep have been shipped into Chelmsford from other states. These have been properly identified and released, most of them for slaughtering purposes.

At the present time 19 herds are under state and federal supervision and the authorities are hoping to test all cattle within three years. 70 per cent of all cattle in the United States are now under supervision.

ARNOLD C. PERHAM, Inspector of Animals.

REPORT OF BOARD OF FIRE ENGINEERS

To the Board of Selectmen, Chelmsford, Mass.

Gentlemen:

We herewith submit our anual report of the Fire Department.

The Board of Fire Engineers appointed annually by the Board of Selectmen organized this year with Archibald Cook as chief of the department, Sidney E. Dupee and Willis I. MacComb as assistant engineers and Sidney E. Dupee as clerk of the board.

The department consists of 125 men divided into five companies under the following District Chiefs:

Wilhelm T. Johnson, District No. 1. Percy T. Robinson, District No. 2. Norman Edwards, District No. 3. Henry Quinn, District No. 4. Arthur W. House, District No. 5.

We feel that all the companies are well organized and giving efficient service.

We wish to express our thanks to the officers and men of the various companies for their co-operation in making the department an effective unit.

We have adopted a policy of insuring the men while on actual fire duty and going to and returning from a fire, the insurance is with the Massachusetts State Firemen's Association, an organization sponsored by the Commonwealth, which pays \$2500 in case of death and proportionately for minor injuries, the cost is \$1.00 a year per man and we feel that the slight expense is more than justified by the possible benefit which may be derived and the protection afforded the Town.

We have had the American LaFrance pumper at the North Village painted and the pump reconditioned, but we have been advised that it is rapidly approaching the limit of usefulness as a piece of major apparatus and we wish to call the attention of the voters to the fact that it will be necessary o replace it with a new pump in another year at the latest.

After much negotiation the Gamewell Fire Alarm Co. of Boston has released their claim on the Fire Alarm System at the North Village, so that now the Town has a clear title to the property.

A new alarm system has been installed at East Village which is giving very satisfactory results.

The firehouse at the Center has been painted and the roof reshingled. The house at the South Village is in good condition, but extensive repairs will have to be made on the roof of the building at the East Village during the coming year.

We are asking for a special appropriation for fire hose this year, the appropriation made last year for this purpose was not sufficient to replace the amuont broken and allowed nothing for building up a reserve to be used in an emergency, in many places outside the hydrant district it is necessary to pump for very long distances and old hose cannot stand the increased pressure. A sufficient supply of hose is about the most vital thing in maintaining an effective fire department and we feel that the need for this appropriation cannot be stressed too strongly.

The total estimated value of building property and contents in the Town directly endangered by fire amounted to \$143,750 and the total loss caused by these fires amounted to \$11,360.

The department the past year has responded to 71 calls for fires within the Town area and 7 calls for fires in adjoining Towns.

District No. 1, 26 fires.

District No. 2, 31 fires.

District No. 3, 3 fires.

District No. 4, 7 fires.

District No. 5, 4 fires.

We wish to extend our thanks to the Police Department for their efficient co-operation at fires.

Respectfully submitted,

ARCHIBALD COOKE, SIDNEY E. DUPEE, WILLIS L. MacCOMB, Board of Fire Engineers.

DIRECTORS' REPORT, NORTH CHELMSFORD LIBRARY CORP.

The directors of the North Chelmsford Library Corporation submit the following report for the year ending December 18, 1929:

The library has been open 151 sessions.

The circulation for the year, 14,016.

In the purchase of books for a libbrary, there are three things to be considered, first, the needs of the library, second, the wishes of the public and third, the amount of money to be spent. With us this last, is very much less than we wish it were. Care is always taken to meet all proper demands for books, and the librarian is always pleased to have suggestions. When the demand is much stronger for fiction, the library must go without books for reference and specialties, which would make the library more valuable to the student or reader.

195 new books have been added this year, and also quite a number have been re-bound.

Respectfully submitted,

ARTHUR WHEELER, President. LORRAINE S. BUTTERFIELD, ALICE E. FREEZE.

REPORT OF THE TRUSTEES OF THE ADAMS LIBRARY

The Board of Trustees met at the Library, Feb. 16, 1929, and chose the following officers and committees:

Chairman: Albert H. Davis. Secretary: Mrs. E. R. Clark. Treasurer: Rev. Wilson Waters. Librarian: Mrs. Ida A. Jefts.

Assistant Librarian: Mrs. G. W. Peterson.

Purchasing Committee: Mrs. E. R. Clark; Committee to Approve Bills: Albert H. Davis, Mrs. E. R. Clark; Prudential Committee: A. H. Davis, Rev. Wilson Waters; Committee on Periodicals and Reading Room: Miss Frances Clark, Miss Lottie L. Snow, Rev. Wilson Waters.

The new electric lighting system put in the Library by the Town has been a great improvement and gives much satisfaction, to the Librarians and Patróns.

The new addition to the Library building, now under construction, and of which a description follows, will necessitate for its proper maintenance an increased appropriation by the Town. We hope to have also an appropriation for repairs on the old building which, in accepting the magnificent gift from a former townsman, the Town agreed to maintain in good condition. The walls and woodwork of the interior have had no renovating for thirty-five years.

THE GEORGE MEMORIAL

An addition to the Adams Library-

By the munificence of the late Madame Orra George Flint, the Adams Library is receiving a substantial addition to its accommodations in the form of a wing 35 ft. by 55 ft. extending from the rear of the present building on the central axis running nearly East and West.

According to the terms of the will the principal apartment in the new wing is a hall (28 ft. x 33 ft. and 13 ft. high) which is to be a memorial to Madame George's father and mother, once residents of this town.

This hall becomes of use in the Librbary work as a lecture and study room and repository for valuable reference, historical and literary works. By means of shuttered windows it can be made dark for illustrated talks.

There also becomes available a children's reading room which will be devoted to juvenile and scout literature with suitable equipment for such work.

Also on the first floor, as an appendage to the present stackroom, the librarian will have a well equipped work-room, which has been long needed for the purpose of cataloging and repairing of books.

The second story is arranged for a historical collection of various antiquities now in the Library's possession, and others which the Trustees hope will be forthcoming as gifts or loans.

We desire only archaeologically interesting furniture, books, old prints, maps or records which pertain to the past life of the Town of Chelmsford.

The general architectural style of the main building has been followed in the addition, both without and within, and provides a dignified westerly facade. The construction of the addition is being very acceptably executed by the Edwards and Monahan Company.

It is proposed to form a Historical Society in Chelmsford to collect and preserve objects and facts connected with its past history. At the 250th Anniversary of the Incorporation of the Town, in 1905, there was exhibited a splendid collection of Chelmsford antiques, eight hundred items, which were loaned from Chelmsford homes. Probably the greater number of these are still in existence. Should a similar collection be made now, the Town has, by the George-Flint bequest, a suitable, convenient and elegant place to receive and care for such as may be given or loaned for the purpose.

Mr. E. R. Clark, the architect, has designed a beautiful memorial hall in this dignified addition to the Library.

A bill for electric lighting is yet to be paid out of the above balance, in amount about \$25. The meter was not read, hence no bill has been presented. The Prudential Committee have been obliged to order six tons of coal extra which will have to be paid for out of the appropriation for 1930. It has been necessary to heat the new building while plastering and other work is going on.

Our budget for 1930 calls for about \$2,500.

\$15.000 has been drawn from the George Fund to pay for construction, as seen in the above account; and \$767.85 from the interest on the George Fund for Books. No money has been drawn from any of the other funds, which are listed in the report of the Town Accountant.

Disposition of Fines:

The sum of \$400 has been turned over to the County.

The sum of \$1170 has been turned over to the State.

The sum of \$5149.08 has been made for the Town of Chelmsford. \$375.00 of this sum has not as yet been paid as the defendant was given further time to pay this fine.

Our appropriation for the year was \$7100. It has cost the Town of Chelmsford approximately the sum of \$1950.92 to run its Police Department for the year 1929 for a Chief, two regular Police Officers, Specials for Traffic Duty, care of school children and the installation of traffic signs.

In handling the finances of the department, it has been my aim throughout the year, to curtail expenses whenever possible, as you may see by the above report.

In closing, I want to take this opportunity to thank the Townspeople and the Board of Selectmen for their splendid co-operation and courtesies extended to me during he year.

Respectfully submitted,

JOHN E. JOHNSON,

Chief of Police.

January 15, 1930.

Honorable Board of Selectmen:

I submit the following report from December 1, 1929 to January 1, 1930.

The arrests have been as follows:

Drunkenness	. 1
Driving Under the Influence of Liquor	. 1
Driving Unregistered Car	. 2
Driving Uninsured Car	. 2
Attaching Plates	. 2
Operating No License in Possession	. 1
Manufacturing Intoxicating Liquor	. 1
Keeping and Exposing for Sale Liquor	. 1

We have conducted 5 raids and siezed 2 small stills, 1 gaming machine, about 825 gallons mash, 600 lbs sugar and other ingredients for the manufacturing of liquor, one truck (which was turned over to the Federal Agents) and numerous bottles and cans.

Respectfully submitted,

HAROLD C. KING.

Chief of Police.

REPORT OF THE HEALTH DEPARTMENT

The year ending December 31st, 1929 will go into history as a banner year so far as contagious diseases are concerned with one exception, that of Measles, very few cases have been reported.

The Board is pleased to end the year with a balance to return in all but one appropriation.

An attempt was made to better the condition of Beaver Brook, as it runs through the town, two Septic Tanks were put in. Others are contemplated and will probably be put in during the Spring. Plans were started to secure the Cushing Mill Pond, rebuild the Dam and clear the pond of Alders and rubbish. Also a wall to protect the Mill property from the water. But, owing to legal difficulties, and the unwillingness on the part of some of the interested parties, we did not succeed in getting it for 1929.

The rebuilt dam would furnish water to flood the Brook in dry, hot weather, and also furnish bathing in the Summer and Skating in the Winter

The Clinic was held in April for the Schick Test, and all children not immune were reimmunized. Another Clinic was held in October to immunize all children not already immune, and a large number were done. We would urge all residents of Chelmsford to consider the Septic Tank for the disposal of Sewage. A large number have already put them in, and when they are installed right, there is no trouble.

The Board stands ready at all times to advise or assist anyone wishing information on Septic Tanks, or locating them.

Our thanks are due and heartily given to Drs. Scoboria and Varney for their help and to the former nurse and the present one, Mrs. Mae Lewis. We were very fortunate in securing the services of one already trained in that class of work.

We remain,

G. A. McINTOSH GEORGE A. McNULTY J. O. OSTERHOUT

ANNUAL REPORT-MILK INSPECTION DIVISION

December 31, 1929.

To the Chelmsford Board of Health,

Chelmsford, Mass.

Gentlemen:

I have the honor to present the report of the Milk Inspection work for the year beginning January 1, 1929.

There were seventeen distributors licensed to deliver milk from wagons; thirty-two stores were licensed to sell milk; five stores were registered to sell oleomargarine. One milk plant was issued a pasteurization license.

Thirty-seven dollars, collected for licenses, were paid to the Town Treasurer.

The average daily milk consumption was 1759 quarts, 634 quarts are sold as pasteurized, 925 quarts are sold raw, 233 dairy farms supply milk to Chelmsford. Nine distributors sell pasteurized milk, twelve sell raw milk, four selling both pasteurized and raw. Two dairies in the Town produce Massachusetts Grade "A" raw. One dairy produces milk for Grade "A" Pasteurized. Several dairies had their herds tested during the year. These tests as a whole showed a high percentage of reactors present. If the local producers hope to hold their market the must seriously consider the problem of eliminating the T. B. reactors from their herds.

There were 736 chemical; 257 bacterial; and 247 sediment samples examined from distributors. The highest bacterial sample was 320,000; the lowest 4,000; the median average 36,000 per cubic centimeter.

There were 265 chemical; 389 bacterial; 217 sediment; and 561 temperature samples examined from producers.

Respectfully submitted,

M. F. MASTER,

B. S. in Chem.

SLAUGHTERING OF ANIMALS

January 1, 1930.

To the Board of Health, Chelmsford, Mass.

Gentlemen:

During the year 1929 there have been slaughtered by licensed butchers or by owners on their own premises and inspected by me: 875 Cattle, 982 Calves, 637 Hogs, 1156 Sheep.

There were condemned: 46 Cattle, 83 Calves, 6 Hogs and 1 Sheep. Also 12 livers and about 500 lbs. of meat.

All inspections were reported to State Authorities.

Respectfully submitted,

ALBERT S. PARK.

Inspector of Slaughtering.

REPORT OF INSPECTOR OF MARKETS

January 1, 1930.

To the Board of Health, Chelmsford, Mass.

Gentlemen:

During the year 1929 I have made 93 calls on markets and butcher carts in different parts of the town.

Some poultry and meat had to be destroyed but in most places conditions have been very good.

Respectfully submitted,

ALBERT S. PARK,

Inspector of Markets.

REPORT OF MIDDLESEX COUNTY EXTENSION SERVICE

The following is a report of the work carried on in the Town of Chelmsford under the auspices of the Middlesex County Extension Service.

In boys' and girls' 4-H club work 155 were enrolled in the clothing, food, poultry, garden and canning clubs. Ten local leaders assisted in this work: Mrs. David Olsson, Miss Esther Kochian,Mrs. John Birtwell, Mrs. A. W. Austin, Mrs. Lucia Norton, Mrs. Eva. Dobson, Mrs. Eva Erickson, Miss Julia Koulas, Carl Johnson and Fred Holt. In the garden contest conducted by Middlesex North Agricultural Society, Frank Burton and Eva/Locapo won prizes for outstanding club work. Julia Koulas did excellent work in the garden club and was awarded the county championship. A Two Day Trip to the Massachusetts Agricultural College was awarded to George Leedburg, poultry club; Barbara Worthen, food club; Mabelle Birtwell, room beautiful; Julia Koulas, clothing and Frank Hannaford, poultry club, for doing outstanding work in these various clubs. The 4-H clubs in Chelmsford Center gave a program for the Parent Teachers' Association.

In home economics work, three groups, one in Chelmsford Center, one in East Chelmsford and another in West Chelmsford, carried on the various programs in the Living-Room Improvement project. A series of five meetings were held and 197 new methods were used by those attending in solving their Living-room problems. Information was passed on to ninety women who were unable to attend the meetings. The Vegetable Preparation program was carried on by two groups and a great deal of interest was shown.

In agriculture most of the interest this year has confined itself to dairying and fruit growing. Two dairy meetings were held, one for the purpose of discussing methods of improving marketing conditions and the other to discuss with the state inspector facts relative to the control of Bovine Tuberculosis. For those interested in fruit growing a spray demonstration was held at the orchard of E. H. Russell and was attended by twenty farmers. A demonstration in the control of Curculio, a serious pest to the orchard men, was carried out on the farm of L. W. Faulkner. Forty-eight farm visits were made to assist local farmers with their individual problems.

At the Chelmsford Grange an illustrated talk was given on producing quality apples.

Eight educational motion picture shows were given to a total attendance of 2842.

County-wide meetings in poultry, fruit growing and market gardening have been available to the Chelmsford people and many attended the county picnic held during the summer at Wayside Inn, Sudbury, Mass.

FOREST WARDEN'S REPORT

January 1, 1930

Board of Selectmen,

Chelmsford, Mass.

Gentlemen:

There have been 124 forest and grass fires in the Town during the year, none of which has caused any serious damage.

When we consider the exceptionally dry season we must consider the town very fortunate that no large fires have occured.

The good work of Observer C. R. Blood in locating and reporting fires has done much toward keeping down the fire damage.

The better understanding and observance of the permit law has also been an important factor in achieving this limit.

Besides the District Chief the following Deputy Forest Wårdens have been appointed: Charles A. House, Allan Adams, Ray E. Sargent, Fred W. Merrill, Walter Merrill and Robert Henderson.

Permits are required by the State Law between March 1st and December 1st and have been issued by the following persons, Precinct 1, Ray E. Sargent, Precinct 2, Percy Robinson, Precinct 3, Archie Cooke. Precinct 4, Henry Quinn, Precinct 5, Sidney Dupee and Precinct 6, Robert Henderson.

SIDNEY E. DUPEE,

Forest Warden.

SCHOOL CALENDAR

The school year is divided into a fall term ending at the Christmas vacation, and three terms after the holidays.

Fall terms from Sept 3, 1929 to Dec. 20, 1929.

Second term from Jan. 6, 1930 to Feb. 28, 1930.

Third term from March 10, 1930 to April 25, 1930.

Fourth term from May 5, 1930 to June 27, 1930.

The school year of 1930-1931 will open on Tuesday, Sept 2nd with teachers' meetings. Pupils will report on Wednesday, Sept. 3, 1930.

NO SCHOOL SIGNAL

In case of extremely bad storms or of roads dangerous because of ice, a signal for no school is given on the fire alarms at the Center, North, West, South, and East, three blasts, repeated three times. When given at 7.15 there are no sessions for the day. The signal at 11.15 indicates no afternoon session for the grades.

TEACHERS

The table shows the teachers at the beginning of the school year 1929-30 the position held, the date when service in Chelmsford began, and the institutions in which they prepared.

REPORT OF SCHOOL COMMITTEE-1929

Town of Chelmsford

TO THE CITIZENS OF THE TOWN OF CHELMSFORD:

We herewith submit the report of the School Committee for the year 1929.

We strongly urge every voter and parent within the town to carefully read and study the report of the Superintendent of Schools—it is a very concise and clear statement of the subjects it covers. We wish to emphasize the Superintendent's statement as to the crowded condition in both the Westlands Grammar and the High School, and we recommend that a committee be appointed to make a full and careful survey of the problems confronting them of this nature.

Steps to utilize all availabe space at the High School have already been taken, and an increased enrollment, such as is anticipated next fall, will have to be met temporarily by using part of the Grammar School for the over-flow.

^{*} Deceased.

The past year marked the close of the long and devoted service of Miss McFarlin in the school system of the Town, and the Superintendent and the School Committee feel that we voice the wishes of her many pupils and friends, when we recommend that the Grammar School Building on Wilson St, be named in her honor.

The Parent-Teacher Associations in all parts of the Town have in the past year lived up to the records of other years for a very active interest and cooperation with the Committee and with the Teachers, in working for things that tended to make friendly and pleasunt relations.

The School Department is very fortunate to have such faithful and concientious men in charge of the School Buildings throughout the Town.

The personnel of the Janitors remains unchanged with the exception of the late Mr. Itichard Robertson of East Chelmsford, who passed away the latter part of the year. His term of service was marked with efficient care of the school building in his charge, and pleasant and courte-ous bearing toward all who came in contact with him.

The present Town Warrant for the first time for a number of years contains no article calling for outlay of any major amount, other than current expenditures during the coming year.

There has been installed a toilet system in the Old Princeton Street School (so called) and the exterior of the same school has been newly painted, and the cupola repaired.

The exterior of the Westlands School has been painted, and the grading at the rear of the school has been brought to a suitable condition.

The matter of transportation has seen a decided change in the School Committee policy. Since motor buses have been used for transportation until last fall, the Town has owned and maintained two busses. The service and record established by them was very satisfactory. The School Committee entertained the project of changing entirely to contract system, only after it was seen that a material saving could be effected. After careful study of the situation bids were called for, based upon rules and conditions that would give the Committee as full and complete control of the operation and conduct of the buses as though they were directly owned by the Town. It was found that by contract the Town would effect a net saving of approximately what would be represented by the depreciation and interest of the investment in Town owned buses, namely approximately \$2000 yearly. One of the Town owned buses was about six years old and would have had to be replaced last fall, and the other bus this coming season. The reasons stated decided the School Committee in favor of the contract system, and a contract of three years was entered into with Mr. George Marinel of North Chelmsford.

Lack of sustained interest in the evening school maintained at North Chelmsford for the past few years caused abandonment of the project last fall.

Harmonious relations exist throughout the school system. We have a teaching force that is in the main very good, and in some schools where the turn-over has been low it is decidedly above the average. As vacancies occur we shall endeavor to maintain the same high standards.

Respectfully submitted,

EDWARD B. RUSELL
J. EARL WOTTON,
JOHN A. McADAMS,

School Committee.

REPORT OF SUPERINTENDENT

TO THE SCHOOL COMMITTEE:

Herewith is submitted my second annual report, the 56th in the series of school reports, together with reports by the Principal of the High School, the supervisors, nurses, etc., all of which I endorse as part of this report I have emphasized this year two features of our school system, teachers and their salaries, and the need of more school room. Last year I discussed at length the topic of the promotion and grading of pupils and I would refer parents who have questions regarding the progress their children are making to pages 111-113 of the report of 1928.

TEACHERS AND SALARIES

The report of this year would be incomplete without special mention of the retirement of Miss Susan S. McFarlin. She began her fifty years of service to Chelmsford children in the East school on April 14, 1879. The report of 1880 said: "Miss McFarlin has secured most marked and praiseworthy success." From that commendation of her first year's work to the year completed last June it has been the consensus of opinion of pupils and parents, of school committees and superintendents, of her fellow teachers and the general public that she continuously reached unusually high standards both in teaching and in administration. She was transferred to the Grammar School at the Center in 1893 and later was made principal of the school. More than any other one person she has molded the thoughts of the pupils at the Center, formed their ideals, shaped ther characters; and by doing this over a long term of years, as her pupils class by class became the men and women of affairs, she has left a permanent imprint on the life of the community. She retires with the love and admiration and best wishes of all who have known her.

In the High School Miss Helen A Reed, who had taught English for two years, resigned at the end of the year. In July Mr. Ralph P. Coates, vice-principal and science teacher for eight years, resigned in order to go into business, and just before the opening of the fall term Mr. Daniel W. Torrey, who had served one year, announced that he had entered the Naval Air Service and would not return. For the first position Miss Daisy B. MacBrayne, a teacher of wide experience, was secured. Miss C. Edith McCarthy was made vice-principal, and Mr. C. Owen Greene, a Bates graduate who had been principal of the Highland Avenue school since Nov. 1927, was promoted to the science position. Air. Walter D. Hayes, a graduate of Bowdoin, with three years' experience in the Dover, N. H. High School, was secured for the last vacancy.

On April 1st Mr. Harold Meyette resigned the principalship of the Quessy school in order to accept a private school postion at Verbank, N. Y. Mr. Earl C. Suitor, a graduate of a three-year course at Plymouth Normal, who was teaching at Sandwich, N. H., was engaged for the position. Mr. Forrest was transferred from the East school to the principalship at the Center, and Mr. William H. McLin, a graduate of Gorham Normal, who had been teaching three years in Hardwick, Mass. was secured for the principalship at East Chelmsford. For the Highland Ave. principalship, Mr. Harry J. Kane, a graduate of the four year course at Bridgewater Normal was engaged.

In August Miss Esther M. Kochian, who had taught the 5th and 6th grades at the East school since 1925, resigned in order to accept a position in Haverhill. The term opened with an experienced substitute in charge, and later Miss Mary F. Robinson, formerly teacher of the 2nd grade at Princeton St., was given the position.

Mr. Ellsworth R. Thwing, supervisor of physical education for two years, declined re-election and accepted a similar position in Braintree. Mr. Robert A. LaFountain, who had studied at Springfield College and was physical director in the Lewiston-Auburn Y. M. C. A., was chosen for the position. Miss Mary Sheehan resigned as school nurse on August 1st, and Mrs. Mae S. Lewis, school nurse in Townsend, was engaged. On the request of Principal Clarence M. Weed, it was voted to allow 4th year students in the music course at Lowell Normal to do practice teaching in the High School under the direction of Miss Hyde, as critic teacher. The arrangement is working out to the advantage of all concerned.

I commend your action in securing for the three positions in the High School teachers of experience. A school system can reasonably absorb and train one or two beginners each year, but when teachers who have already passed their apprenticeship can be obtained at slight increases in salary then it is only good business to secure them. In every case it is our duty to buy the best service that is obtainable for the money we have to use, regardless of the claims of those who seek positions or of the pressure they may bring to bear. In the long run the choosing of teachers is the most important task school committees and superintendents perform.

In December the teachers in the elementary schools presented a petition to the school committee, asking for increases in salaries of all grade teachers. The committee gave the matter careful consideration, after instructing the superintendent to ascertain the salary schedules of towns similar to Chelmsford, and felt obliged to reply that in ther opinion the time is not opportune for a general increase in salaries. Final action on such a request must be taken by the voters in town meeting, and it is therefore fitting that the facts ascertained be made public and that the principles underlying salary schedules be discussed.

Prof. Ellwood B. Cubberly of Stanford University is one of the recognized authorities on public school administration. The principles given below are taken from his works, and such salary schedules as he describes are almost universally used.

- 1. The beginning salary should be high enough to secure well-trained and well-educated teachers.
- 2. "Small automatic annual increases for a period of years, say five to seven years, during which time the teacher is gaining competency and reaching a point beyond which increase in teaching efficiency is usually small without further professional preparation. This common naixmum should represent a living wage for a person with the habits, instincts and training of a teacher."
- 3. Provision for possible salary increases, above the common maxmium, for teachers of high classroom efficiency who give satisfactory evidence of professional growth.
- $4.\ \,$ Provision for special salaries for positions calling for special capacity.

With these principles in mind, let us consider the salary schedules of 20 towns which can reasonably be compared with Chelmsford. By the report of the Department of Education for the year ending June 30; 1929, Chelmsford had a population of 6,573 (state census 1925), a valuation of \$7,696,150, and a valuation per pupil of \$5,774. Note the last item, the taxable wealth for each pupil enrolled, a most significant figure if comparisons are to be fair. No town is included in the comparison in which the valuation per pupil exceeds \$7090.

The salaries for the first year range from \$800 to \$1200, but the towns paying \$1000 or more require that the teacher shall have had previous experience. The Chelmsford salary for beginners without experience, \$990, seems to be an average one. It meets the first of the stated principles,, as we have no lack of applicants of two and three year normal courses at that amount.

About half of the towns give \$50 automatic increases, the remainder giving \$75 or \$100. The increase in Chelmsford is \$50.

The maximum ranges from \$1250 to \$1600. Quite generally for salaries of \$1400, or more, professional study is required, or the salary is paid only in the 7th and 8th grades or junior high school. The average for the 29 towns would probably be nearer \$1400 than the \$1300 maximum of Chelmsford. Our maximum salary for elementary schools is undoubtedly low.

Prof. Cubberley and other writers on school administration point out the relation between salaries and efficiency in teaching. Higher salaries should mean better educated, better trained, more progressive teachers; and such teachers mean better schools. In any school system the teacher holds the key position. She is the one in actual con-

tact with the pupil. The worth of the system depends on the efficiency of her work in the classroom. She can be aided in material ways by giving her a comfortable room in which to work, by supplying her with all needed books and tools, by keeping the pupils in the best possible condition through the efforts of the nurse and physician and dentist; but after all these things have been done, the fact remains that it is the teacher herself who counts most. She should be given encouragement to increase her professional preparation, to develop her personality, to augment her power, all in order that from a full storehouse she may have the more to give back to her pupils. For this purpose the "common maximum," the "living wage," of principle 2 above is not sufficient. I urge upon the voters of the town that they support a policy of giving substantial increases above the present common maximum to those teachers of successful achievement who will add to their professional perparation by summer school work. This would put into effect, principle 3, which is not at present employed, and would react to the benefit of the boys and girls in school.

The correspondence with other towns regarding the salaries of teachers is on file in the superintendent's office and may be consulted by anyone who is interested. Also, a brief summary of the findings of the investigation may be had on request.

During the last school year or the present year about one-third of the teachers have taken university extension courses given in Lowell. Last summer Mr. Forrest and Miss McBrayne took courses at Boston University, Miss Robinson at Yale, Miss Low at Middlebury, Mr. La-Fountain at Springfield, Mr. Hobbs, Miss Monahan and the superintendent at Harvard. The school system would benefit by having more of the teachers take summer school work.

SCHOOL BUILDINGS

A problem of major importance for the town to solve is that of additional school room. It should be approached with a clear understanding of all the facts, and the solution should provide for the needs of coming years so far as is possible. The table below shows the enrollment by rooms in October and the seating capacity of each room.

It is generally considered that a teacher in an elementary school can reasonably be required to take care of about 35 children, and that 40 should be the maximum. You will note that by this standard nearly every room is filled to normal capacity. In a few rooms the enrollment exceeds the number of seats, and desks of the movable type are used for the overflow. This is not possible in the Westlands, as the school rooms are very small. A few 5th grade pupils are now being carried from the Westlands district to the Center, such action being made necessary by the fact that over 40 pupils were registered in a room seating only 35. Moreover the Westlands section of the town is growing as evidenced by the building activity, and in all probability there will within a few years be many more children in that neighborhood than the present building can possibly accommodate.

The High School membership has increased 92% in the last ten years, going from 160 in the fall term of 1920 to 307 last fall. This is not a phenomenal growth; high school enrollment everywhere has increased enormously in recent years. The building was designed for 225 students. It has no adequate assembly room and no gymnasium. As Mr. Hobbs shows in his report, it is now crowded to its utmost capacity. Literally speaking there is not room in the building for any more desks for students, and no classroom for the additional teacher who will be needed next. Sept., when the enrollment by conservative estimate will reach 330.

Here are the two pressing cases at the present time the Westlands and the High School, but the action taken should so far as is humanly possible, make provision for many years for all sections of the town. The proper procedure would seem to be for the town to authorize the appointment of a committee, which should include the school committee, to make a complete survey and study of the situation and report back to the town. Such a survey might include.

- 1. An estimate of how much the town may grow in ten or twenty years, and in what sections.
- 2. The existing buildings: whether it is feasible to enlarge them if the school population should increase; the possibility of providing playgrounds; etc.
- 3. A study of the high school question from every viewpoint, educational, financial, etc. This is the big question, for it is tied up with all the others, and the committee will need to give it prolonged study. To illustrate, at least two very different solutions are possible, each having advantages and dis-advantages.

One solution might be to adopt the junior high school plan. This involes grouping all the 7th, 8th and 9th grades by themselves; giving them an approved junior high course of study; and providing specially trained teachers. Then the present high school building could be used for the 10th, 11th and 12th grades, for which the building would probably be ample for many years except for the lack of a gymnasium. Provided all the 7th, 8th and 9th grade pupils could be gathered into one school, this plan from a purely educational viewpoint would probably be the best one. But its adoption would involve a new building, either for the school itself, or, if the Center Graded School were used for that purpose, for the first grades at the Center. Also, the plan would increase transportation by more than 50%.

The point may be raised that the town could have two junior high schools, at the North and at the Center. This would necessitate a new building at the North. Educationally the two schools would be much less efficient than one larger one, for the smaller schools could not reasonably offer so many courses. There would be some duplication of equipment, and the cost of instruction would probably be greater, but transportation would be much less.

On the other hand the present organization of eight grades and a four-year high school can be retained. It is still by far the more common organization. It is cheaper; junior high schools cost more year by year than the usual grade organization. But if the present plan is retained provision must be made for the overflow in the Westlands, and perhaps in other buildings, and the High School building must be enlarged to provide for the school of next year, and for 1935 and 1940. In doing this the building could be modernized by providing an auditorium and a gynasium with proper equipment. The cost of transportation would not be increased except by the growth of the school.

Whatever action is taken, two great needs of the High School should be met, an assembly room and a gymnasium. The present arrangement of using the Graded School basement is not only unsatisfactory, but in several respects positively dangerous. The two iron posts in the center of the floor are a serious hazard. It is simply good luck and nothing else that no one has been seriously hurt on them. Perhaps a still greater hazard is the fact that every day, in all sorts of weather, groups of high school students must go down the hill to the other school for their work in physical education, and after their exercises go back to the High School. This is all right in good weather in September and June, but on stormy days, or when the hill is covered with snow or ice, it is a decidedly dangerous practice. Will not the town take action to give the school a suitable gymnasium before broken bones, or a cracked skull, or a case of pneumonia arouses public opinion? No solution of the seating problem will be adequate that does not remedy this condition.

When the addition to the High School is made it will be comparatively easy and inexpensive to provide special rooms for the teaching of practical arts. I endorse emphatically the recommendation of Mr. Hobbs that this improvement be made in the curriculum at the earliest possible date. It would not add to the cost of instruction, for teachers of practical arts can be secured at the same salaries paid teachers of Latin and French, but special facilities must be provided which are impossible in the present crowded condtion of the building. The fact that the Lowell Vocational School is available for boys who desire to learn trades simplifies the problem materially. We need not duplicate their courses, but a school of over 300 students should certainly give attention to those students, who are neither going to college, nor planning to do office work. Mechanical drawing and shop work for boys and household arts for girls are clearly indicated as needs of our school system.

TRANSPORTATION

Two changes have been made in transportation routes. Pupils near Blodgett Park are being carried to Princeton St. instead of to the Quessy School, in order to relieve the overcrowding in the lower grades at the latter school. Also a few are being carried from Stedman St. in the Westlands to the Center. A total of 480 are transported; 196 to the fligh School, 110 to the Center Graded School, 80 to Princeton St. 75 to Quessy and 19 to South. The routes cannot be considered as absoutely fixed; each year slight changes may be made to meet changed conditions. Last year 454 were transported,

MISCELLANEOUS

Owing to the lack of interest in the evening school, as manifested by the small attendance last winter, no attempt was made to secure a class this year. If a minimum attendance of 30 could be assured a school should be opened with two departments. This seems to be impossible now.

Students in the commercial department have been of valuable as-

sistance as clerks both to the principal and to the superintendent. In the office of the latter they have made out under supervision the bimonthly payrolls and entered the school bills in the ledger. Pupils in the 7th and 8th grades collected data for the school census. Public acknowledgement is made for this assistance.

It should always be remembered that the schools represent a cooperative enterprise in which many groups participate. The tax-payers furnish the funds and the voters choose the men who shall direct expenditures. It is impossible in any school report to answer all questions which these citizens may have. I heartily invite any one who desires information on any phase of the work to call at my office for an interview. The stock-holders are privileged to ask questions and to offer criticism.

The parent-teacher associations are somewhat closer in touch with classroom work than the general public; they act in a measure as a clearing-house, through which information goes to the people and suggestions come back to the schools. The work of the school committee and superintendent is to serve as directors and executive in the enterprise, and their chief duty is to provide such conditions that the teachers can serve most efficiently. They are the all-important workers in this enterprise.

The bus drivers, who bring the children to school safely and comfortably; the janitors, who see that the schools are warm and clean; the doctors and nurse, who look after physical welfare and guard against contagion; the women who are providing hot lunches—all these have important places in the joint enterprise. And finally there are the fathers and mothers, devoted to their children, anxious for their welfare, hopeful that they may reach the highest pinnacle of success—they are the most vitally interested of all and their support is the most necessary. To all these, who have made my work and the work of the teachers a real pleasure, I desire to express deep thanks.

Respectfully submitted,

GEORGE S. WRIGHT

Mr. George S. Wright, Superintendent of Schools, Chelmsford, Mass.

Dear Sir:

It is with pleasure that I make to you my third annual report as Principal of Chelmsford High School.

We opened our school this last September with an enrollment of over 309 pupils and the total enrollment for the year has been 310. This is a growth of slightly more than 49 pupils over our total registration of last year. Forty has been the normal increase of students for the past two years and the size of the present eighth grade which should come into high school next September, is about the same as was the entering class this year. This would seem to show, in so far as we can estimate that the enrollment next September will be about 330. This is about 100 more pupils than were purposed to be accommodated in the building when it was built. Every room is filled to capacity with desks and many temporary desks have been placed in all available spaces, even to the extent of actually over-crowding the room. Still we have 21 pupils who have no desks of their own in which to keep their books and supplies. We have even opened up an unfurnished room in the basement which has been filled with chair desks and is used as a homeroom by 15 boys. This situation of congestion is relieved somewhat when classes are in session by pupils occupying the Typewriting Room and Room 10 which have no desks and hence cannot be used as homerooms, but are used as class rooms. Including the Principal, there are now ten regular teachers in the high school. There are only nine classrooms in the building and whenever the Principal is teaching the teacher with the smallest class must meet in the room in the basement. Ten teachers are kept busy with 300 pupils this year, four of

them teaching all of the six regular teaching periods of the school day and with a possible increase in enrollment to 330 another year it would seem that an additional teacher will be necessary. But where can she hold her classes in our present building since with the present number of teachers there is not satisfactory room in the building? The time is confronting us when something will have to be done before next September.

The ideal and practical thing to do would be to build on to the high school a gymnasium with an auditorium above. By doing this our present unsatisfactory assembly room, which accommodates about two-thirds of our present enrollment, could be divided into two regular classrooms and furnished as such. There is, no question as to the impracticability and danger of our present gymnasium in the Grammar School basement. The posts in the playing court are a danger and the passing between the gymnasium and the high school out of doors and down a steep grade, cold, slippery, and muddy as conditions often are, is a hazard to the health of the pupils.

While contemplating an addition to the High School a very obvious need in our curriculum should be adjusted by the introduction of Practical Arts, especially Domestic Arts for the girls. We have boys and girls in the high school today taking Latin, French, Algebra, Geometry, etc., and being labeled failures in this work who would be much better occupied in the study of Domestic and Practical Arts. It is true that the pupil not going to college should receive and needs culture and mind training from some classical subjects, but how much better it would be for them to be getting this training of the mind in more practical subjects. We know that we have a good College Preparatory Course for this has been demonstrated by the success of graduates in college, e. g. (from our last two graduating classes we have one boy at Annapolis, one boy at Harvard and are preparing one of our graduates this year for M. I. T.) However out of graduating classes ranging from 35 to 50 only about five or six ever go to college and for the vast majority who will not attend college we need courses of a more practical nature than Latin, French, and Algerbra.

We held this year for the first time an evening session in order that the parents and friends might have the opportunity of seeing the school in actual operation. Four periods of work were shown, the periods being shortened to 30 minutes each, and we were tremendously pleased with the co-operation which we received from the pupils and from the townspeople. Over 180 visitors were counted in the school at one time and all pupils were present except about 20. The apparent success of this enterprise makes us feel that it might be worthwhile to have another "Know Your School Day."

We are in the process of purchasing a moving picture machine and a projection lantern by means of the school funds which are available. All of this money has been raised by the pupils and the healthful condition of these funds is shown in the accompanying financial report by Miss McCarthy.

We were very sorry to lose the services of Mr. Coates this year. For nine years he had given very valuable services to this school and was a most excellent teacher in Science. His position has been filled by Mr. Greene. Mr. Hayes has taken the position left vacant by Mr. Torrey and besides being an excellent teacher, he has enabled us to improve our curriculum by the addition of Mechanical Drawing. Miss MacBrayne, an experienced and excellent teacher, is the new head of the English department, replacing Miss Reed who resigned.

I cannot close my report without mentioning the excellent work which Miss Dunigan is doing with the the publication of our school paper, "The Blue Moon," of which we are very proud since it is truly one of our products, being produced entirely within our school, whereas many school publications have to resort to outside printers for production. She has been aided by the assistance received from the English and Drawing Departments. The work which is turned out by the Commercial Departmst such as tickets, special forms, programs, etc., denote its efficiency.

In closing, I wish to thank the townspeople, the Board of Education, the Superintendent and the entire High School Faculty for their cooperation throughout the entire year and to especially acknowledge the gift from the Center Parent--Teacher Association for the blankets which they have furnished for the football team and the athletic pants

and jerseys for the basketball team. This co-operation is greatly appreciated

Respectfully submitted.

HORACE E. HOBBS.

Mr. George S. Wright,

Superintendent of Schools,

Chelmsford, Massachusetts.

Dear Sir:

In submitting my report on the previous year's work, I do it with a great sense of pleasure, because it is the one way I am able to tell the people of Chelmsford the keen enjoyment that is derived in making the children happy through music. Also there are new phases of the work that are brought up each year, which, I am sure, will be of interest to all.

The child is taught to sing lightly, and this should carry on through all the grades. The teaching of the general technique in music is facilitated this year by the addition of new books where they are sorely needed. Little by little the old books are being replaced by new and more up to date materials.

Music appreciation is given just as large a place in the routine as materials will allow. The children love it, and respond quickly and easily, to the various moods and rhythms the music portrays.

We have rhythm bands in four schools this year. The Parent-Teacher Associations purchase most of these instruments, and I greatly appreciate the interest shown bby the P. T. A., as there is nothing better than the rhythm instrument to deveylop a child's sense of rhythm. One school purchased its own rhythm band with money raised by the school itself.

This year, through an arrangement of the State Department of Education, the music department of the high school is a part of the training system of the State Normal School, at Lowell. Senior members of the tour year music course at Lowell Normal come to high school and teach a block of the work supervised by myself, under the direction of Inez Field Damon, music director at Lowell Normal. Each girl comes twice a week for a period of five weeks, and teaches the class, chorus, notation, and music appreciation. This work is a great benefit to both school and pupil—to school because of the close relationship to Lowell Normal and to pupil, because of the broadening out to phases of the music work that could not be taught before due to lack of materials. The school choruses are mixed, and each class meets twice a week. Boys' and girls' glee clubs have been organized and meet every two weeks for rehearsals. The school orchestra meets once a week for rehearsal and furnishes the music for assemblies and school parties.

Thanking every teacher for his or her splendid co-operation, I am,

Yours truly,

CHARLOTTE L. HYDE.

Chelmsford High School,

Chelmsford, Mass.

Mr. George S. Wright, Superintendent of Schools, Chelmsford, Massachusetts. Dear Sir:

I herewith submit to you my first annual report concerning the Physical Education Department of the Chelmsford School system.

Owing to the length of time that I have been a member of this system. I cannot submit a very lengthy report, but must confine myself to the Fall term of the 1929-30 school year.

The Physical Education program is carried out in all grades and the scope of activities range from story plays in the first and second grades to calisthenics, marching tactics, tumbling, dumb-bell drills, free hand exercises, dancing and group games in the high school.

All high school classes were held out of doors in the fall while good weather prevailed. I introduced football in all classes because, noticing the small attendance of high school pupils at the local football games, I found the reason to be ignorance of the game. I think the knowledge gained helped the attendance somewhat and the physical needs of the pupil were fully taken care of.

Due to the large enrolment of pupils this year, especially in the high school, I found it necessary to create two new classes in the high school and one at the Highland Avenue school. This necessitated a complete change of last year's schedule and consequently I did not deem it advisable to have any of the grade school classes out of doors, as most of the period would have to be spent in marching out and back, leaving no time for any activity. This is a condition which I think should be remedied, as Physical Education for children has as its chief fundamental, play, and children are more apt to respond out of doors than they are in the class room.

I wish to take this opportunity to submit the needs of the Physical Education Department: A fully equipped gymnasium, including showers and locker space, full time assistant, high school freshmen, sophomores, juniors, and seniors having their own gymnasium periods so as to allow progressive work through the four years, separate enclosed play spaces for the boys and girls of the grade schools to be used in inclement weather, supervised play both at recess and noon time.

The Physical Education Department wishes to express its sincere thanks to the Centre Parent--Teacher Association for the wonderful cooperation they have shown in the giving of the blankets to be used by the football teams and the training units to be used by the basketball teams.

Respectfully submitted,

R. A. LA FOUNTAIN,

Physical Director .

Children 10% underweight weighed monthly.

. We have had a School Dentist in Princeton Street School, North Chelmsford for three months. We have finished our dental work there, which was 91 cases. We have a great many still to be cared for, and a number are going to their family dentist. We were very fortunate in securing Dr. James C. Coughlin for our dentist this year.

I find in my health survey the children who have enlarged tonsils, poor teeth, nasal trouble, cervical glands, are the so-called underweight children. I also find they have not enough sleep, poorly ventilated rooms, insufficient rest, and excessive social activities.

I feel certain that pediculosis could be eliminated from schools altogether if the parents would give care to the children's personal hygiene.

I do hope the parents will take a step in the right direction, and early in 1930 take their children of pre-school age to their family physician and have their defects discovered and corrected before they enter school in September. This would greatly reduce the defects found in our first graders and would make better school attendance.

School Health Cards will be gladly sent to mothers who wish to take their children to their family physician for examination, after which the cards are returned to school. I would like to make it very plain that no child will be allowed to enter school who is not vaccinated or has a doctor's certificate. It seems unnecessary to send notices home year after year to parents who do not have the defects corrected. Delays are dangerous. There were 94 of our first grade children having 127 defects. If some of these defects had been corrected before entering school, how much better our children's health would be, and also our attendance. Many of these children were not vaccinated but have been since. We had health pictures and talks in all Chelmsford schools, including High school, in December. They were given by the New England Food and Dairy Council, and were appreciated by teachers and pupils. I appreciate the co-operation I have had since Sept. 1, 1929.

Yours respectfully,

MAE S. LEWIS.
