Serving Chelmsford For  
Over 50 Years

The purpose of publishing the following fire alarm box locations is to provide a centralized fire alarm system for the Town of Chelmsford; but foremost, to furnish the Call Fire-fighters of the Department with a fast, accurate location of the fire or emergency.

All box numbers with some exceptions will consist of three digits. The first digit representing the precinct, the second digit representing the zone in that particular precinct while the third digit represents a comparative distance from the station to that box location. That is to say, box numbers ending in the digit 1 or 2 being further from the station than boxes ending in digits 8 or 9. It will be noted that some numbers have been reserved for future street development.

All public buildings such as town halls, schools and libraries have been assigned two digit boxes. Included in this group are the public squares, such as: Vinal Square, Central Square, Belleville Square, etc. Boxes located in industrial concerns are of four digits.

The number 5 followed by the precinct number will be used to call Firefighters to the fire station in that precinct for assignment.
